**Agenda (Morning Group)**

This project was funded by the European Union's Justice  
Programme (2014-2020) under Grant Agreement No. 882068

TREIO aims to develop and pilot an all-round cross-border training on European Investigation Order (EIO) implementation to foster the use and successful exchange of EIO forms and evidence across EU. The project is to tailor the content to cross-border specifics (investigative measures, cooperation, procedures, safeguards, data protection compliance) and provide video tutorial on the technical aspects of the EIO implementation and the use of the e-Evidence Exchange Digital System, developed by EC. The training will spread across 12 MSs adopting the System within the e-CODEX Infrastructure, namely Austria, Bulgaria, Croatia, Czech Republic, France, Germany (NrW), Greece, Italy, Lithuania, Portugal, Slovenia, and Spain.

As a first step, the project has mapped stakeholders' training needs and designed the project training methodology and content (in English). It is now organizing a train-the-trainers' series to better prepare the launch of the all-round TREIO trainings across Europe.

The **training of Master Trainers** seeks to produce two main results: (1) to validate the structure and the modularity of the content, including the selected practices, case law, use cases, visuals, etc.; and (2) to contribute to the better adaptation of the training content for online environment by providing relevant feedback and considerations.

Further, TREIO adopts a cascading approach, organizing another 6 trainings for trainers, led by selected Master Trainers, and supported by the TREIO Team. In a cascade model, a group of trainers is trained in a specific subject and after that they are considered proficient trainers. This group then become the trainers to a second generation of trainees. There are two main reasons for adopting this approach for the TREIO project: (a) this method allows for a wider sharing of theoretical and practical experience with each layer of trainees adding to the quality of the training materials; and (b) the strong expanding nature of the model, often referred to as multiplier approach to training, means that many more trainees can be reached at the end of the several series of training phases.

The Master Trainers will use TREIO materials as the basis of their training to the second group of trainers. Since the Master Trainers selected to follow the training are all experienced EIO users, one expects that the training to the second group of trainers will also be very grounded in the national practical reality of issuing and receiving EIOs.
